

How to Use VMware Horizon

Follow the steps below to access your desktop and applications using VMware Horizon **Client** or VMware Horizon **HTML Access**.

If you have any issues please contact the IS Support Center at 856-575-4700.

Client

NOTE: This method requires initial installation.

Refer to the VMware Horizon Client Installation Guide available on the **Remote Access** page of **IS Educational Resources** on the **Intranet**.

1. From your **desktop**, **double left click** the **VMware Horizon Client** icon.

2. VMware Horizon **Client** will open. **Double left click** on the **cloud icon** labelled **access.ihn.org**.

3. Type in your Inspira Health Network **computer/corporate username and password**. *These credentials are not your Soarian login credentials. It will be the same username and password you use for Inspira Email, PACS or authenticating to the Internet on an Inspira PC.* Then, click the **Login** button.

HTML Access

1. Open your internet browser. In the **address bar**, **type access.ihn.org** and press **Enter** on your keyboard.

2. Click on the **right icon** labelled, **VMware Horizon HTML Access**.

Client

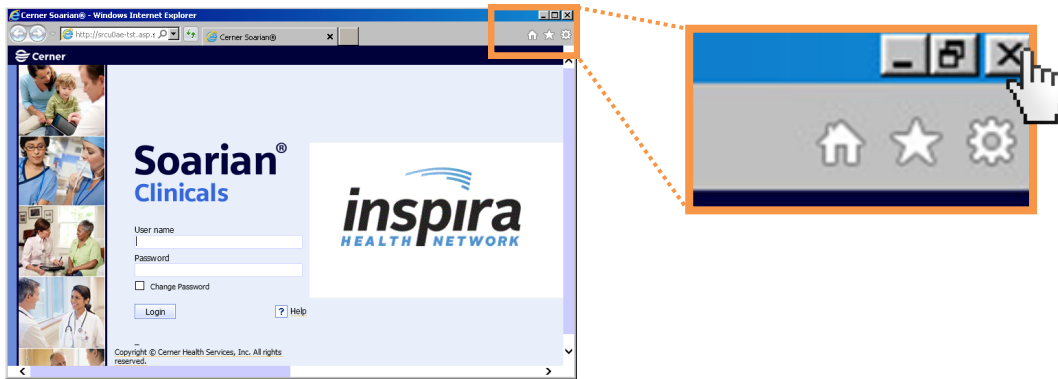

- Once logged in successfully, **double left click** on the desired application in order to launch it.

Note: A dialog box will pop up asking if you would like **VMware Horizon Client** to have access to your PC. Click the **Deny** button.

- The selected application will open in a new window. To **exit the window**, click the **"X"** at the top right corner.

- To **end your session** and **log out** of VMware Horizon **Client**, click on the **plug** icon at the top left of the application.

- To **end your session** and **log out** of VMware Horizon **HTML Access**, click on the menu icon from the left navigator. Then, select **Log off**.
